May 21, 2003

I have been Nemanja Kostic's manager at Siemens CTSE1 for 6 months. It was my pleasure to work with Nemanja, because he consistently meets and often exceeds his job requirements.

During his work here, he was assigned to a team working on UML SPE project which is basically a simulation environment for testing different client/server networks. His task was to provide TCP/IP communication between different modules in the simulation. He has finished his assignment on time and his TCP/IP module fits our needs very well.

Besides this task, he also had a few different projects he worked on. One of them was installation of CVS system for project coordination of other team members. The other task was implementation and testing of different Enterprise Java Beans running under JBoss application server, like EJB's for banks, for database manipulation and for benchmarks.

Nemanja is an enthusiastic, dedicated employee with reliable work habits. He often does not need guidance or supervision, but willingly accepts it when offered. He is consistently successful in improving his skills, and he works hard to do so.

You will not easily find an employee more dedicated than Nemanja, and I recommend him as a valuable addition to your engineering staff. If you'd like more information, I'd be happy to provide it. Please use the phone number below.

Sincerely,

Dr. Michael Pönitsch
